WILSON WILL SEND TROOPS INTO MEXICO

Great Britain, Germany and France to Make Formal Showing, After Which U. S. Will Recognize Huerta Government.

Senator Fall Criticizes Secretary Bryan for Deserting State Post for Chautauqua When Government Faces Grave Problems.

Special Cable to The American.

MEXICO CITY, July 19.—An official communication was added to the international situation today when it became known through an authoritative source at the British Legation that England had recalled Minister Stronge, following complaints of his actions during the bombardment of the city. He will leave shortly to make way for Minister Cardena, appointed in his place.

Still another unexplainable situation arose when it was learned today that Italy had recalled her minister.

Lipton's Challenge To Race for America Cup Finally Taken

Event To Be Held Off Sandy Hook In September, 1914—Irish Club Agrees to Conditions.

NEW YORK, July 19.—After many months and almost endless correspondence, the New York Yacht Club has accepted the Royal Ulster Yacht Club's challenge, on behalf of Sir Thomas Lipton, for another race for the America Cup. The race will be sailed off Sandy Hook in September of 1914.

Formal announcement to this effect was made by Secretary George A. Cornack, of the New York Club, to-night.

Mr. Cornack stated that the challenge had been accepted formally by the New York Yacht Club, but that the New York Club had been waiting for the Royal Ulster Club to accept its conditions before making an announcement.

The first race is to be sailed Thursday, September 10, 1914; the second, September 22, 1914, and the third, Tuesday, September 15, 1914.

PISTOL DRAWN IN CLUB FIGHT SAYS MEMBER

Warrant for Waiter Is Sworn Out by Auto Man After M. & M. Affair.

THREATS ARE CHARGED

Member Declares Servant Covered Him With Revolver After Dinner Party in Rooms.

LONDON, July 18.—Measure taken by the police to frustrate a suffragette demonstration on the occasion of the King's visit to Liverpool was revealed in the Liverpool Peace Court yesterday during the case in which Helen Jolly, secretary of the local branch of the Women's Social and Political Union, was charged with doing damage to property.

It is stated that the head of the city detective force, having failed to obtain a promise from Miss Jolly that there should be no demonstration when the King drove through Liverpool, the night before the King's visit, police mounted a ladder and sawed down the windows of the hotel. It is alleged that Miss Jolly was so annoyed by these tactics that she secured a poker and attacked the windows of the premises opposite.

Threatens to Kill Girl by Wireless In Blackmail Plot

Inventor Telephones Rich Salt Lake Woman He Will Stay Here Unless \$1,000 is Paid.

SALT LAKE CITY, July 19.—W. L. Cummings, 23 years old, an electrician, and inventor of a wireless machine which, it is claimed, will give a light in an electric bulb and explode dynamite at a considerable distance, is being held by the authorities here to-night on charges made by private detectives that he sent a black hand letter to Miss Dorothy Hamberger, a rich Salt Lake girl, and threatened her life. Cummings was arrested while telephoning to Miss Hamberger to give new instructions about leaving the \$1,000 which he demanded. He was turned over to the Government authorities.

Cummings, according to the authorities, threatened to blow Miss Hamberger, using his invention to set off the explosives. He recently came here from Georgia.

SEATTLE MAYOR MUZZLES PAPER AS RIOT GOES ON

"Times" Gets Injunction to Halt City's Action, and Police Are Threatened With Arrest.

DANIELS NOW EXPLAINS Secretary of Navy Declares He Had No Thought of Industrial Workers in Speech.

SEATTLE, July 19.—Rioting, which began last night as the result of an encounter between sailors from United States warships in the harbor and members of the Industrial Workers of the World, continued throughout the day and night.

Mayor George S. Cotterill this afternoon declared the city under martial law and ordered soldiers from the harbor and members of the Industrial Workers of the World, continued throughout the day and night.

Colonel Alden C. Bletten, publisher of The Times, upon receipt of the Mayor's orders, appeared before Judge Humphreys, of the Superior Court, and obtained an injunction restraining the Mayor and Chief of Police from interfering with the publication of the paper. The Mayor refused to recognize the authority of the court until he had been called before Judge Humphreys and warned that he would be sent to jail unless he obeyed the court's mandate.

The court also issued a score or more of John Doe warrants for the arrest of policemen who were harassing the Times press room. Seeing no other alternative than to lift the ban on the press, the chief of police surrounding the Times building was withdrawn and the first issue of the paper appeared on the streets late in the afternoon.

Mayor Cotterill charges that The Times incited the riot by publishing a garbled account of the speech of Secretary of the Navy, Daniels, in which it was made to appear that the Secretary expressed himself as being in favor of expelling members of the I. W. W. from the country.

Late this afternoon Judge Humphreys issued a second order notifying sailors men that they might open their places of business without danger of interference from the police.

Shore Permits Refused.

Commanders of the warships in the harbor withdrew all shore leaves and refused to issue shore permits to the sailors.

From National Park Inn, Secretary Daniels sent this telegram regarding his speech:

"The reference I made to the flag and my statement that the red flag meant danger was the same as originally made by me at a banquet of Railroad Men, at St. Louis, Mo., at Danah's, a few days ago. It had nothing to do with the local conditions in Seattle.

"I believe in free speech and a free press, as the bulwarks of our liberty. Every evil that exists or can be righted by appeal to the judgment of the American people. The weapon of violence to redress evil is bringing more evil into existence than he can hope to cure by violence.

"Obedience to lawful authority and respect for the flag must precede any reform. The man who takes the law into his own hands imperils American institutions and jeopardizes the hopes of the people for a better future.

"GEORGINA DIES IN KENTUCKY.

LINCOLN, KY., July 19.—The body of a woman, identified as Georgina Anderson, aged 27 years, a ministerial student, Anderson's home was in Anderson, Ind. Her body will be sent to Georgia for burial Sunday night.

Hawthorne to Walk 1,000 Miles Solitary Jaunt to Follow Parole

Novelist to Use Prison in Writings

Julian Hawthorne, famous writer, now prisoner in Atlanta penitentiary, and route he will take on walk to New York when he is paroled in fall.

Atlanta, July 19.—Julian Hawthorne, famous writer, now prisoner in Atlanta penitentiary, and route he will take on walk to New York when he is paroled in fall.

COUNSEL OF FRAK SAYS DORSEY HAS SOUGHT TO HIDE FACTS

Attorneys Rosser and Arnold, in a Statement to the Press, Make Bitter Attack on Solicitor for His Conduct of Case.

Call Attention to Secrecy Maintained by Prosecution, and Declare Action of State's Attorney Has Inflamed Public Opinion.

Another Z. Rosser and Arthur R. Arnold, attorneys for Leo M. Frank, who will be tried July 31 on the charge of killing Mary Phagan, joined Saturday in a bitter attack upon the policy of Solicitor Hugh M. Dorsey, whose procedure in the case, they said, had inflamed public opinion and had placed the Solicitor far below the dignity of his office.

In a formal statement, they charged that Dorsey had ignored his constitutional and legal functions and had sought to usurp those of the Grand Jury by his attempt to block the indictment of the defendant by that body. They described his action as unprecedented and dangerous in the extreme, and represented Dorsey and Conley as partners in "a harmonious concert."

The document, which is one of the few public statements issued by the defense, is bristling with criticism of the prosecution's conduct throughout the investigation of the murder mystery, and charges that Dorsey has maintained his belief in Frank's guilt apparently for no other purpose than to convict Frank.

Call Attention to Secrecy.

Attention is called to the secrecy with which evidence is being gathered by the prosecution in manufacturing the case against Frank, and to the shroud of evidence which may be found for or against him, so that it may be presented, if favorable, and that it may be met and disproved if false.

Declaring any intention of criticizing the previous Grand Jury, Attorneys Rosser and Arnold cite the circumstance of Conley's first confession, into which he was forced by the discovery that he could write after he steadfastly denied he could, and asserted that the fact that he had been able to bring this incident to the attention of the Grand Jury, but that he, if reported were true, actually directed that it be not done.

Another indication of the Solicitor's alleged domination over the Grand Jury was contained, they said, in the attorneys for the defense, in his reported action in insisting that the jurors pledge themselves not to act in any way on the suggested Conley indictment during his absence on a vacation.

Statement of Defense.

The statement in full follows: Counsel for Leo M. Frank has refrained from making a statement for the papers except under strong provocation. Clearly counsel on both sides should refrain from any comment or oration on any action of the Grand Jury to be taken at its meeting next Monday, which might tend to hamper or limit the Grand Jury in their action upon the Conley case.

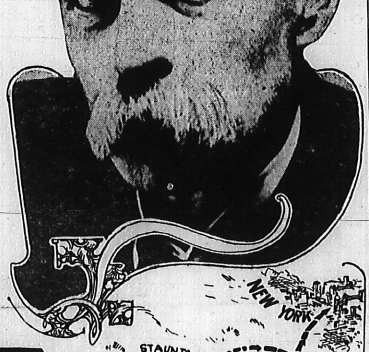

The Grand Jury is an independent body; it is under the control of no one. Solicitor General is the address of that body as to legal principles merely, but he has no right to interfere with its action in determining who shall or shall not be indicted.

To permit a Solicitor General to usurp the position entrusted to him by the people to decide for himself who shall and who shall not be indicted is a danger too great to be contemplated.

Apply to Solicitor.

With this preliminary statement we reluctantly make a reply to Solicitor Dorsey's interview in this morning's paper.

It is rather remarkable that the Solicitor General had a care to make a statement of these facts.

Experience in Atlanta Penitentiary Will Be Worked Into Future Literary Works of Author.

Julian Hawthorne, the novelist, is planning a 1,000-mile cross-country walk from Atlanta to New York, to begin late in July, when he will be released from the United States penitentiary. His application for a parole will be granted, it is announced from Washington.

Julian Hawthorne is a hefty, dynamic gentleman for all his 47 years. Out at the Atlanta Federal Prison, where he is Register 415, he turns out volumes of copy for his prison paper, good copy, too, that would frighten any young and vigorous reporter. And daily he performs a feat that few reporters can equal, and cub reporters are wonderful because of the power that lies in their legs. Hawthorne walks ten or fifteen miles around the walls each day.

He is eager for the jaunt.

It is a natural outgrowth of his energy that this white-haired old man should plan to walk from Atlanta to New York when he is released from prison and becomes Julian Hawthorne again instead of Register 415. He has talked of this ambition to the officers and the guards, and they say that he is as eager for the jaunt as any boy.

It is generally regarded as certain that Hawthorne will be released the latter part of July probably July 26 or 27. His term rightly extends until November, but his application for a parole, it is understood, has been informed by the prison parole board, and awaits only the sanction of Attorney General McKeynes before it will be effective. According to the regulation governing Federal Prisoners, which grants to every prisoner a parole after he has served creditworthy two-thirds of his sentence, Hawthorne will be eligible for release within a week or two.

Dr. Merton Will Ride.

At the same time it is likely that Dr. W. M. Merton, of New York, who was convicted jointly with Hawthorne on the charge of fraudulent use of the name of Dr. Merton, will be released within a week or two.

Billie Burke, the actress, is recovering from her illness. She is recovering from her illness.

Senator Fall Criticizes Secretary Bryan for Deserting State Post for Chautauqua When Government Faces Grave Problems.

Washington, July 19.—Adding to the criticism directed in this morning's Washington Post at Secretary Bryan for deserting his post for a Chautauqua tour when the government faces grave problems, Senator Fall has criticized the Secretary's conduct.

Senator Fall, in a speech delivered in the Senate today, said that the Secretary's absence from his post was a disgraceful example to the public.

Suffragette Locked In to Prevent Row

Measures of Liverpool Police Taken During King's Visit Are Revealed in Court.

Special Cable to The American.

LONDON, July 18.—Measures taken by the police to frustrate a suffragette demonstration on the occasion of the King's visit to Liverpool were revealed in the Liverpool Peace Court yesterday during the case in which Helen Jolly, secretary of the local branch of the Women's Social and Political Union, was charged with doing damage to property.

It is stated that the head of the city detective force, having failed to obtain a promise from Miss Jolly that there should be no demonstration when the King drove through Liverpool, the night before the King's visit, police mounted a ladder and sawed down the windows of the hotel. It is alleged that Miss Jolly was so annoyed by these tactics that she secured a poker and attacked the windows of the premises opposite.

New Newport Dance Called 'Un Tartare'

Inventor of Terpsichorean Novelty Says It is Not So Spicy as It Sounds.

Special Cable to The American.

LONDON, July 19.—Criel Davis, who sails to-morrow for New York, has a new dance to teach Newport society. It is called "un tartare," but Davis says it is not so spicy as it sounds.

It is not a jumpy dance, but consists mainly of pointing the toes and bending of the knees, he declares, and contains no scandalous allusions.

Mrs. John Drexel, Mrs. Praton Gibson, Mrs. Maclean and the Vanderbilts will learn the "un tartare" from Davis and Miss Bianca Waldo, the American whirlers.

Downtown Block in Indianapolis Burning

Flames in Heart of Wholesale District Not Controlled at Midnight—Loss \$500,000.

INDIANAPOLIS, July 19.—Fire in the heart of the downtown wholesale district, the total loss of which probably will reach \$500,000, threatened last night to sweep the entire block bounded by Maryland, Georgia, Pennsylvania and Kentucky streets.

The four-story brick building occupied by the Layman Carter Company, wholesale hardware dealer, was destroyed, with a loss estimated between \$200,000 and \$250,000. The fire spread to the buildings adjoining the Hamilton Hardware Company, tobacco wholesaler, and the Atlas Paper Company, and at midnight the flames were raging fiercely in both of these buildings.

Hat Pin Thrust Is Gallantry's Reward

Traveling Salesman Rescues Woman of Womany Warfare and Gets Pinned as Result.

ST. LOUIS, July 19.—Joseph Butler, traveling salesman, has doubts about the use of a hat pin to express gratitude. He was on a train running between Clayton, Ill., and Alton, when a woman in front of him made a frantic appeal to him to stop the train and get her hat, which had blown out of the window. Mr. Butler gave the necessary signal; the train was stopped, and he rescued the hat.

He was thanked and decided to pin the hat in front of the woman. The conductor suggested that she sit in the seat in front of her, so as to be the first to see the hat. This she did with such energy that the hat pin went through the back of the seat and two inches into Mr. Butler's back.

U.S. Grant, Jr., Weds; Only One Child to Greet Stepmother

Ceremony Performed Secretly and Announced at Dinner Which Former Friends Refused to Attend.

SAN DIEGO, CAL., July 19.—Ulysses Simpson Grant, Jr., and Mrs. America George Putzbaugh Saturday evening, July 19, were married at the home of the Police Court Judge entirely without the participation of either Mr. or Mrs. Grant.

The starting announcement of the wedding was made at a dinner to-night at the U. S. Grant Hotel. Many old friends of Mr. Grant refused to attend, and the only child of the aged bridegroom who was present was U. S. Grant IV, a Junior at Harvard.

Friends and relatives of Mr. Grant have been bitter in their opposition to this, his second, marriage and pleaded in vain for him not to wed again. His grown son, Carter Grant, and his three daughters absolutely refused to recognize their "new mother."

It is said that Mr. Grant, in retaliation, has threatened to cut them off entirely in his will unless they change their attitude before he sails on to Europe to-morrow morning.

The children say they stand firm in their support of their father, but their father has been taken advantage of by Mrs. Will, now Mrs. Grant.

30 Divorces in Three Hours Breaks Record

One Decree Granted at Rome Because Wife Was Poor Gardener.

ROME, July 19.—An all-time record for divorces for Floyd County was smashed to-day when 30 decrees were granted within three hours. Thirty cases were set for trial. In nearly every instance cruel treatment was charged.

Because he planted tomato, and that he would not treat Mrs. Otto Bamann as he should, her husband, John Bamann, Jr., became enraged and beat her. Mrs. Bamann claimed that this and other cruel treatment constituted a good cause for divorce. A jury thought the same thing.

Motor Cars to Cut High Cost of Dying

Storage Battery Buses To Be Put In Service in Chicago as Funeral Equipment.

CHICAGO, July 19.—The high cost of dying is to be reduced. Storage battery motor buses are to be put in service as funeral cars. The change from carriages to buses will result in a saving of \$80 in the cost of each funeral. As there are 31,000 deaths in Chicago each year, the saving will be \$2,480,000.

Torpedo Boats Asked For Atlantic Fleet

Aviator, Who Wishes to Make Trial, Says Without Them Attempt Would Be Suicidal.

PROVIDENCE, R. I., July 19.—Jack McCrex, a Pawtucket aviator, has received a copy of the rules governing the cross-Atlantic aeroplane flight to be conducted under the management of the Royal Aero Club of the United Kingdom.

A wealthy New York banker is backing McCrex. It is understood that offers are being made by Rhode Island Representatives to have torpedo boat destroyers stationed at different points along the route, but no definite decision has yet been made by the Government. Without these, McCrex says, the flight would be deliberate suicide.

Chinese Province Proclaims Secession

Governor General of Kwang Tung Announces Beginning of Campaign Against Pricked Yuan Shi Kai.

HONGKONG, July 19.—The secession of the province of Kwang Tung from the republic was proclaimed by the Governor General of Kwang Tung today. The capital of the province is Canton, the home city of Yuan Shi Kai, the man whose government the revolt is directed.

The Governor General declares that he has proclaimed the secession of Kwang Tung from the republic. He has appointed a provisional council to lead the revolt. The council has elected a provisional President, Yuan Shi Kai.

DORSEY FIGHTS MOVEMENT TO INDICT CONLEY

Solicitor Is Bombarded With Letters to Proceed Against Negro as Slayer of Mary Phagan.

THE GRAND JURY IS CALLED

Hottest Battle of Famous Case To Be Waged Behind Closed Doors of Inquisitory Body.

Solicitor Dorsey is fighting vigorously the movement in the Grand Jury to indict Jim Conley Monday for the murder of Mary Phagan, despite the bombardment of letters from many citizens and by the sentiment of some of its own members.

It is for the consideration of these letters and petitions, asking the reopening of the Phagan matter, that the meeting has been called.

Crucial Trial Coming. With the first adjournment won by those in favor of the indictment of Conley, the hottest battle is yet to be waged behind the closed doors of the jury room.

Should the Solicitor be driven back from this position by the Grand Jury again regarding his wishes and consent to the indictment of Conley, he will be forced to take refuge in the last ditch and make his fight against the indictment of Conley.

It is regarded as beyond the realm of possibilities that he could persuade the jurors to return a "no bill" against Conley on the charge of murder.

Dorsey Refuse to Comply. The Solicitor's attitude in the matter plainly was shown by his statement when Foreman Hoot went to him Friday seeking to have him call the meeting.

The meeting's only purpose will be to exploit the evidence and embarrass the State, and I hope the Grand Jury when it meets will decide to leave the matter alone.

Evidence More Direct. They add that the evidence against Conley is far more direct and damning than any ever brought against Frank. They charge on this account that Conley has been protected and "kidded" when he should have been placed on the same basis as the other suspect in the case and should go before the jury in that aspect.

Atlanta Day To Be Society Event Knoxville Exposition Plans Feature

Mrs. Van Deventer, Daughter of Mr. Justice Lorton, to Visit City for Conservation Fair.

Atlanta Day at the National Conservation Exposition in Knoxville this fall will be one of the largest of the most spectacular arranged for the national fair in the East Tennessee city.

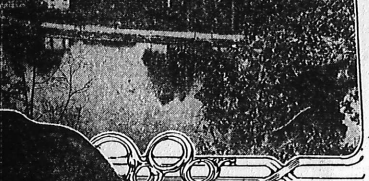

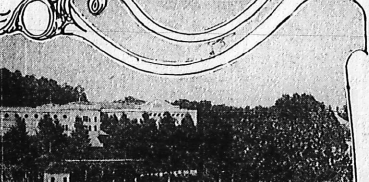

Atlanta Day, according to plans now on foot, will be largely a society function, for the members of the Woman's Department of the exposition headed by Mrs. Harace VanDeventer, a daughter of Justice Lorton of the Supreme Court of the United States, as well as Knoxville's acknowledged society leader, expect to formulate their plans so that many of Atlanta society folk will make the trip to Knoxville for that day.

Mrs. VanDeventer to Come Here. The plans for this special day are now in the making. They will be matured probably while the delegation of Knoxville business men is in Atlanta next week, and later when Mrs. VanDeventer and some of her coworkers in the woman's department come to the Georgia metropolis to take up the matter with Atlanta society folk.

In the preparation for what undoubtedly will be the South's greatest exposition, the woman's department is playing no small part. In Knoxville the exposition management considers itself fortunate that Mrs. VanDeventer consented to take the direction of the woman's work. She has a very large circle of friends and acquaintances throughout the country, in cities of the North as well as in cities of the South, and what is more, she has succeeded in interesting large numbers of society women in the work she has under way.

Mrs. Mabel Boardman, president of the American Red Cross Society and a woman who finds time in the multi-

At the top Mrs. Harace Van Deventer, President of the Woman's Department of the National Conservation Exposition is shown, while the middle picture shows the Liberal Arts Building. Mrs. George W. Denny, a Vice President of the Woman's Department is shown in the lower picture.

Mrs. Van Deventer made a trip to Nashville to interest the women of that city. On very short notice a meeting was called. Two hundred or more Nashville women went to the meeting. A number of men went also. There was much enthusiasm shown. The result was that plans were completed then and there for a Nashville Day.

More than that—the Nashville Park Commissioners, under whose auspices a splendid exhibit of paintings is being shown in the Parkhouse of that city, voluntarily and as a compliment to Mrs. VanDeventer decided to continue the exhibition almost to the time set for the opening of the Conservation Exposition. Then the exhibits will be moved to Knoxville.

Mrs. Denny, fourth vice president, who is also the president of the Tennessee State Federation of Women's Clubs and very active in the club life of Knoxville and Tennessee is planning now to come to Atlanta within a short time to talk matters over with Atlanta women, when Mrs. VanDeventer and Mrs. Denny will come or where the meeting will be held has not been decided.

Mrs. Hammond is president of the National Civic Federation, which will have an extensive exhibit at the exposition. Mrs. VanDeventer and other women whose names are known the country over will also be guests of the woman's department, which is undoubtedly nothing that needs conserving.

Mrs. John Hays Hammond, of the millionaire mining engineer, who was

ARTIFICIAL RAIN INSTALLED ON ATLANTA FARM

Will Zimmer, C. S. Witham and Loring Brown Protect Crops With Pipe System.

"These dry nights, when my crops are buring up, I can smell that artificial rain a mile off," said a farmer in the suburbs of Atlanta.

The "artificial rain" of which he spoke is produced on three "fancy" farms within a short distance of Five Points, and, according to the unanimous verdict of Will Zimmer, C. S. Witham and Loring Brown, who own "overhead irrigation" plants, it means salvation in dry years.

Stories are told of the wonderful crops these farmers grow—two yields of Irish potatoes a year, for instance, from 200 to 300 bushels an acre; cuttings of alfalfa, crops of beans when the market is bare and beans worth 75 cents a bushel.

Yet the system is simple enough. On posts eight feet high rest pipes about two inches in diameter. These pipes run the whole length of the fields, and the lines of pipe are twenty feet apart. About two feet apart in the pipes are tiny holes. A gasoline engine pump, which operates, an abundant supply of water, and the thing is done.

Six hours each evening, when there is no rain, the pump starts and the streams of water spurt from the holes in the pipes. The water, as the streams are thrown almost from one hole to the next, is broken up into convenient intervals, making it possible to turn the pipes so that the streams are directed in any direction and the ground thoroughly soaked.

This system exceeds ditch irrigation for Georgia soil, for the reason that Georgia clay does not soak up water as fast as the soil in other sections. Besides, the soil sakes when water is applied in this way. "Artificial rain," however, coming down like a mist, permeates the whole soil and brings it to the surface.

Of course, an overhead pipe system is expensive. The cost is estimated at \$250 per acre. This might be reduced to \$100 per acre if the pipes were not entirely favorable. The increased yield, however, more than overbalances the initial outlay.

Loring Brown tells of getting an \$1800 crop of Irish potatoes from an acre, under his pipe system. In reality, there were two crops, a spring planting and a fall planting, and the potatoes were sold at a high price because they were sold for seed.

"I have only one objection to see in the artificial rain," said Mr. Brown, as he sat in a swing on his front gallery and sorted a big basket of lettuce. "My objection is that people read of big yields and good profits and get anxious to try the same methods. They want to spend a lot of money to emulate Belmont, and fail to take account of the hard work that must go with it."

"A farmer, however, he has a fancy farm or one of the old-fashioned kind, must work eighteen hours a day. He must be on the job 24 days a year. That is what many people forget. They see a big yield and get greedy and try to emulate Belmont, and fail to take account of the hard work that must go with it."

Mr. Zimmer, on his Kimballville farm, described in the newspaper, said Mr. Brown, as he sat in a swing on his front gallery and sorted a big basket of lettuce. "My objection is that people read of big yields and good profits and get anxious to try the same methods. They want to spend a lot of money to emulate Belmont, and fail to take account of the hard work that must go with it."

WIVES CREDITED WITH KEEPING HUSBANDS ALIVE

Medical Association Finds That Benedict's Regular Existence Is Better Than Bachelor's.

Supervision by wives as a possible reason for the greater longevity of married men than of bachelors is discussed by The Journal of the American Medical Association in its editorial section of the recently published statistics on this point. There is no remark on the statistics of more suicides among married men than bachelors.

"The Journal has further information indicating that careful as the married man may be with respect to one removed through the death or illness of his wife, and that grass widowers leap into indiscretion and are lopped off more rapidly than other those still in the state of those who escaped matrimony."

"Undoubtedly the low death rate among married men is partly due to the fact that, as a rule, those who are in good health, are ready to marry, while those who are not, are not, especially if suffering from any definite ailment, are not willing to assume the burden and responsibility of the family, but that of husbands of the same age, and even as a rule it is higher than that of the bachelors of the same age."

"This view would seem to be corroborated by the statistics as to the mortality among married men who have lost their wives either by death or divorce. The death rate among these 'unmarried men' is considerably higher than that of husbands of the same age, and even as a rule it is higher than that of the bachelors of the same age."

"The widows do fast. For instance, widowers and divorced men between 20 and 30 years of age, who are single men. From 30 to 40 it is only 14.1 to 12.5, while from 40 to 50 the mortality of divorced and widowers is slightly less than that of single men of the same age. From 50 to 60, however, it is slightly higher, one more, and from 60 to 70, it is one more, and from 70 to 80, it is one more, and from 80 to 90, it is one more, and from 90 to 100, it is one more, and from 100 to 110, it is one more, and from 110 to 120, it is one more, and from 120 to 130, it is one more, and from 130 to 140, it is one more, and from 140 to 150, it is one more, and from 150 to 160, it is one more, and from 160 to 170, it is one more, and from 170 to 180, it is one more, and from 180 to 190, it is one more, and from 190 to 200, it is one more, and from 200 to 210, it is one more, and from 210 to 220, it is one more, and from 220 to 230, it is one more, and from 230 to 240, it is one more, and from 240 to 250, it is one more, and from 250 to 260, it is one more, and from DORSEY FIGHTS MOVEMENT TO INDICT CONLEY

Solicitor Is Bombarded With Letters to Proceed Against Negro as Slayer of Mary Phagan.

THE GRAND JURY IS CALLED

Hottest Battle of Famous Case To Be Waged Behind Closed Doors of Inquisitory Body.

Solicitor Dorsey is fighting vigorously the movement in the Grand Jury to indict Jim Conley Monday for the murder of Mary Phagan, despite the bombardment of letters from many citizens and by the sentiment of some of its own members.

It is for the consideration of these letters and petitions, asking the reopening of the Phagan matter, that the meeting has been called.

It was in the face of Solicitor Dorsey's bitterest opposition that the meeting was called at all. Foreman Heath has issued his order for the meeting and the Grand Jury will be held in its efforts to reopen the case with a view of indicting Jim Conley and after Dorsey explicitly had expressed his strongest disapproval of such a move.

Crucial Battle Coming. With the trial skirmish won by those in favor of the indictment of Conley, the hottest battle is yet to be waged behind the closed doors of the Grand Jury.

Should the Solicitor be driven back from this position by the Grand Jury and discharged, his wishes and taking up the investigation, he will be forced to take refuge in the back ditch and make his fight against the indictment of Conley.

With all the weight of evidence which has piled up against the negro,

Atlanta Day To Be Society Event Knoxville Exposition Plans Feature

Mrs. Van Deventer, Daughter of Mr. Justice Lurton, to Visit City for Conservation Fair.

Atlanta Day at the National Conservation Exposition in Knoxville this fall will be one of the largest of the many special days arranged for the national fair in the East Tennessee city.

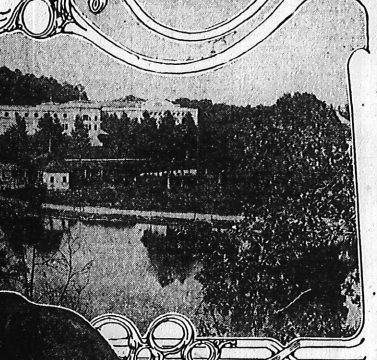

Atlanta Day, according to plans now on foot, will be largely a society function, for the members of the Woman's Department of the exposition headed by Mrs. Horace Van Deventer, a daughter of Justice Lurton of the Supreme Court of the United States, as well as Knoxville's acknowledged society leader, expect to formulate their plans so that many of the Atlanta society folk will make the trip to Knoxville for that day.

In addition it is planned to make Atlanta Day at the exposition one of peculiar and intimate interest to all residents of the city.

Mrs. Van Deventer to Come Here. The plans for this special day are now in the making. They will be matured probably while the delegation of Knoxville business men is in Atlanta next week, and later when Mrs. Van Deventer and some of her coworkers in the woman's department come to the Georgia metropolis to take up the matter with Atlanta society folk.

In the preparations for what undoubtedly will be the South's greatest exposition, the woman's department is playing no small part. In Knoxville the exposition management considers itself fortunate that Mrs. Van Deventer consented to take the direction of the woman's work. She has a very large circle of friends and acquaintances throughout the country, Atlanta of the North as well as in cities of the South, and what is more, she has succeeded in interesting large numbers of society women in the work she has under way.

Miss Mabel Boardman, president of the American Red Cross Society and a woman who finds time in the multi-

At the top Mrs. Horace Van Deventer, President of the Woman's Department of the National Conservation Exposition is shown, while the middle picture shows the Liberal Arts Building, Mrs. George W. Denny, a Vice President of the Woman's Department is shown in the lower picture.

Mrs. Van Deventer made a trip to Nashville to interest the women of that city. On very short notice, a meeting was called. Two hundred or more Nashville women went to that meeting. A number of men went also. There was much enthusiasm shown. The result was that plans were completed then and there for a Nashville Day.

More than that—the Nashville Park Commissioners, under whose auspices a splendid exhibit of paintings is being shown in the Parthenon of that city, voluntarily and as a compliment to Mrs. Van Deventer decided to continue the exhibition almost to the time set for the opening of the Conservation Exposition. Then the exhibits will be moved to Knoxville.

One of them will be shown in the Art Building, the other, which is the celebrated collection owned by Charles E. Freer, a millionaire art collector of Detroit, will be placed in the Woman's Building.

Mrs. Denny Also Active. Mrs. Van Deventer and some of her coworkers among them Mrs. George W. Denny, fourth vice president, who is also the president of the Tennessee State Federation of Women's Clubs and very active in the work of Knoxville and Tennessee, are planning now to come to Atlanta within a short time to talk matters over with Atlanta women. Just when Mrs. Van Deventer and Mrs. Denny will come or where the meeting will be held has not yet been decided.

The fact that Atlanta business men are showing a keener interest in the exposition—which is one designed to benefit the entire South—again they have heretofore, and the chances that Atlanta will be well represented at the exposition, is counted upon to rest on the women.

The woman's department has planned its work along broad lines. The stereotyped exhibits that always have been a part of women's departments in other expositions will have no place in the Woman's Building at the National Conservation Exposition. It is a woman's department which is planning to do that there is something more than the stereotyped and the health women's department all over the country.

So that is what the exhibits in the woman's department will be—a very large extent. Of course, the exhibits will be a result of interest and attraction to women will not be

ARTIFICIAL RAIN INSTALLED ON ATLANTA FARM

Will Zimmer, C. S. Witham and Loring Brown Protect Crops With Pipe System.

"These dry nights, when my crops are burning up, I can smell that artificial rain a mile off," said a farmer in the suburbs of Atlanta.

The "artificial rain" of which he speaks is produced on three "ranches" farms within a short distance of Five Points, and, according to the unanimous verdict of Will Zimmer, C. S. Witham and Loring Brown, who own "overhead irrigation" plants, it means salvation in dry years.

On posts eight feet high rest pipes about two inches in diameter. These pipes run the whole length of the fields, and the lines of pipe are twenty feet apart. About two feet apart in the pipes are tiny holes. A siphon system, a pump which it operates, an abundant supply of water, results in a deluge in any direction.

Six hours each evening, when there are no clouds in the sky, the streams of water spurt from the holes in the pipes. At high pressure, these streams are thrown almost from one line of pipe to the next. Handies at convenient intervals make it possible to turn the pipes so that the streams are deflected in any direction and the ground thoroughly soaked.

This system exceeds ditch irrigation for Georgia soil for the reason that Georgia clay does not soak up water from a ditch in sufficient quantities. Besides, the soil cakes when water is applied in this way. "Artificial rain," however, coming down like a mist, permeates the whole soil and brings up the water to the surface.

Of course, an overhead pipe system is expensive. The cost is estimated at \$250 per acre. This might be reduced somewhat if the farmer performs all the labor himself. The increased yield, however, more than overcomes the expense.

Loring Brown tells of getting an \$1800 crop of Irish potatoes on an acre, under his pipe system. In reality, there were two crops, a spring crop and a fall crop. The Irish potatoes brought a high price because they were so good.

Fail to Realize Work. "I have no objection to my seeing Belmont farm described in the newspapers," said Mr. Brown, as he sat in a swine on his front gallery. "My objection is that people read of the yield on a good profit, then are anxious to try the same method. They want to spend a lot of money to emulate Belmont, and fail to take account of the hard work that must go with it."

A farmer, whether he has a fancy farm or one of the old-fashioned kind, must work eighteen hours a day. He must work 285 days a year. That is what many people forget. They laid him out on his back, and the entire crop of potatoes on Belmont, Mr. Brown estimates that dry season cost him \$2000. That winter he went to Greeley, Colo., where overhead irrigation is in use, to see if he could work out a solution of the problem.

He saw a fine assurance of success. The pipe lines were the answer. But the farmer there had grown his own pipe lines produced around Greeley, but the difference in price covered by being closer to good market overcomes the lesser yield, and makes the system pay.

Zimmer Installs System. Mr. Zimmer, on the Kimballville Farm, installed an identical system. Belmont was installed in 1908, but he has had occasion to see it since that time. His farm has been blessed with abundant rains.

But rain is freakish in choosing its itinerary. In Atlanta itself and out as far as the Chattahoochee, River rains have been sufficient this year. But beyond the river there is a serious drought. Crops are drying up, irrigation would have been the salvation of the farmer.

And as they sit in front of their homes at night, they can smell the sweet odor of refreshed fields at Belmont—"that darn artificial rain."

WIVES CREDITED WITH KEEPING HUSBANDS ALIVE

Medical Association Finds That Benedict's Regular Existence Is Better Than Bachelor's.

Supervision by wives as a possible reason for the greater longevity of married men than of bachelors is discussed by The Journal of the American Medical Association in its editorial section of the recently published statistics on this point. There is no remark on the statistics of more suicides among married men than bachelors.

The Journal has further information indicating that careful as the married men may be, with restraint once removed through the death or divorce of the wife, widowers and divorcees are told of the wonderful crops these farmers grow—two yields of Irish potatoes a year, for instance, from 200 to 250 bushels an acre—such cuttings of alfalfa, crops of beans when the market is bare and beans are worth \$2 a bushel.

Yet the system is simple enough. "Pipe Supply Rain."

On posts eight feet high rest pipes about two inches in diameter. These pipes run the whole length of the fields, and the lines of pipe are twenty feet apart. About two feet apart in the pipes are tiny holes. A siphon system, a pump which it operates, an abundant supply of water, results in a deluge in any direction.

I will accept said bids up and until 11 o'clock A. M. of Friday, July 25, 1913, at which time said bids will be opened at Room No. 113 Grant Building, Atlanta, Ga. Bids may be submitted as an entirety or separately on the stock or fixtures or lease and are subject to the confirmation of the court. For further information and inspection of stock and inventory apply to H. A. FERRIS, Trustee 402 Rhodes Building, Atlanta, Ga. Mayson & Johnson, Attorneys for Trustee.

DORSEY FIGHTS MOVEMENT TO INDICT CONLEY

Solicitor Is Bombarded With Letters to Proceed Against Negro as Slayer of Mary Phagan.

THE GRAND JURY IS CALLED

Hottest Battle of Famous Case To Be Waged Behind Closed Doors of Inquisitory Body.

Solicitor Dorsey is fighting vigorously the movement in the Grand Jury to indict Jim Conley Monday for the murder of Mary Phagan, despite the bombardment of letters from many citizens and by the sentiment of some of its own members.

It is for the consideration of these letters and petitions, asking the reopening of the Phagan matter, that the meeting has been called.

Crucial Battle Coming

With the first skirmish won by those in favor of the indictment of Conley, the hottest battle is yet to be waged behind the closed doors of the Grand Jury. The question first will be on whether the grand jurors consider it proper at this time to proceed in the investigation whose first chapter resulted in the indictment of Leo M. Frank on the charge of slaying Mary Phagan.

Should the Solicitor be driven back from this position by the Grand Jury again disregarding his wishes and taking up the investigation, he will be expected to take refuge in a ditch and make his fight against the indictment of Conley.

With all the weight of evidence which has piled up against the negro, the indictment of Conley is regarded as beyond the realm of possibilities that he could present the jurors to return a "no bill" against Conley on the charge of murder. Dorsey's one remaining hope at this time is that the grand jurors will be so lenient as to waive definite action until after the trial of Frank, when it will be in a position to say whether an indictment shall be drawn against Conley as an accessory after the fact, to which he has confessed, or as the actual murderer.

Dorsey Refuse to Compromise. The Solicitor's attitude in the matter plainly was shown by his statement when Foreman Beattie went to him Friday seeking to have him call the meeting. Dorsey flatly refused and said:

"The meetings of my purpose will be to exploit the evidence and embarrass the State, and I hope the Grand Jury when it meets will decide to leave the matter alone."

"The indictment of Conley at this time will be a useless procedure that will not stop the trial of Frank. It will only have a mild but undesirable effect on the State's case."

"Conley is in jail and is going to stay there for some time. It is where the authorities can put their hands on him, and he can be indicted much more properly after the Frank case has been disposed of than before, and by the delay there is no danger of a miscarriage of justice."

The Solicitor's position is attacked as palpably unfair by those who have been working to bring about the indictment of the negro. Dorsey would have the testimony of the negro accepted as that of any free and trustworthy citizen, while those opposing him declare it should be taken in the light of that of a possible murderer who is endeavoring to shift the blame on another's shoulders, they say.

Evidence More Direct. They add that the evidence against Conley is far more direct and convincing than any ever brought against Frank. They charge that the account placed on the same basis as the other subject in the case and should be before the jury in that aspect.

General Sessions were called Friday to the store published Friday and the Phagan matter was discussed in the morning. Chief of Detectives Lenoir declared that Harry Scott had reaffirmed his belief in the guilt of Conley and the innocence of Conley, except as accessory after the fact.

At the top Mrs. Horace Van Deventer, President of the Woman's Department of the National Conservation Exposition is shown, while the middle picture shows the Liberal Arts Building. Mrs. George W. Denny, a Vice President of the Woman's Department is shown in the lower picture.

Atlanta Day To Be Society Event Knoxville Exposition Plans Feature

Mrs. Van Deventer, Daughter of Mr. Justice Lurton, to Visit City for Conservation Fair.

Atlanta Day at the National Conservation Exposition in Knoxville this fall will be one of the largest of the many special days arranged for the national fair in the Great Tennessee city.

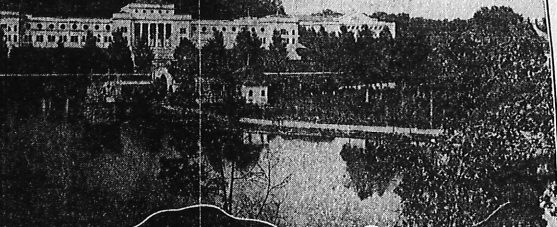

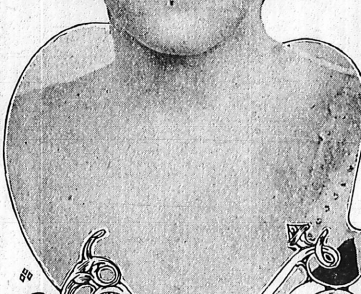

Atlanta Day, according to plans now on foot, will be largely a society function for the members of the "Woman's" Department of the exposition headed by Mrs. Horace Van Deventer, a daughter of Justice Lurton of the Supreme Court of the United States, as well as Knoxville's acknowledged society leader, expect to formulate their plans so that many of Atlanta society folk will make the trip to Knoxville for that day.

In addition it is planned to make Atlanta Day at the exposition one of peculiar and intimate interest to all residents of the city.

Mrs. Van Deventer to Come Here. The plans for this special day are now in the making. They will be matured probably while the delegation of Knoxville business men in Atlanta next week, and later when Mrs. Van Deventer and some of her coworkers in the woman's department come to the Georgia metropolis to take up the matter with Atlanta society folk.

In the preparations for what undoubtedly will be the South's greatest exposition, the woman's department is playing no small part. In Knoxville the exposition management considers itself fortunate that Mrs. Van Deventer consented to take the direction of the woman's work. She has a very large circle of friends and acquaintances throughout the country, in cities of the North as well as in cities of the South, and what is more, she has succeeded in interesting large numbers of society women in the work she has under way.

Mrs. Mabel Boardman, president of the American Red Cross Society, is a woman who finds time in the multi-

task of her various philanthropic work to devote herself to society, will be the guest of the woman's department of the exposition on September 15.

Mrs. Hammond interested. Mrs. John Hay, wife of the Secretary of State, will be the house guest of Mrs. Van Deventer.

Mrs. John Ouellet, of Washington, Mrs. Mabel Westmore and other women whose names are known the country over will also be guests of the woman's department while the Exposition gate is open. Ex-

Mrs. Van Deventer made a trip to Nashville to interest the women of that city. On very short notice a meeting was called. Two hundred or more Nashville women went to that meeting. A number of men were also there. The result was that plans were completed then and there for a Knoxville Day.

More than that the Nashville Park Commissioners, under whose auspices a splendid exhibit of paintings is being shown in the Parthenon of that city, voluntarily and as a compliment to Mrs. Van Deventer decided to continue the exhibition almost to the time set for the opening of the Conservation Exposition. Then the exhibit will be moved to Knoxville.

One of them will be shown in the Art Building; the other, which is the celebrated collection owned by Charles L. Freer, a millionaire art collector, of Detroit, will be placed in the Woman's Building.

Mrs. Denny Also Active. Mrs. Van Deventer and some of her coworkers, among them Mrs. George W. Denny, fourth vice president, who is also the president of the Tennessee State Federation of Women's Clubs and very active in the work of Knoxville and Tennessee, are planning now to come to Atlanta within a short time to talk matters over with Atlanta women. Just when Mrs. Van Deventer and Mrs. Denny will come or where the meeting will be held has not been decided.

The fact that Atlanta business men are showing a keener interest in the exposition—which is one designed to benefit the entire South—than they have heretofore, and the chances that Atlanta will be well represented at the exposition, is counted upon to attract the women.

The woman's department has planned its work along broad lines. The stereotyped exhibits that always have been a part of women's departments in other expositions will have no place in the Woman's Building at Knoxville. The plan is to have the National Conservation Exposition be one of the most interesting and profitable more than the energies and the health of the women.

So that is what the exhibit in the woman's department will tend to be a very large extent. Of course, the exhibit will be of particular interest and attraction to women will not be overlooked.

ARTIFICIAL RAIN INSTALLED ON ATLANTA FARM

Will Zimmer, C. S. Witham and Loring Brown Protect Crops With Pipe System.

"These dry nights, when my crops are burning up, I can smell that artificial rain a mile off," said a farmer in the suburbs of Atlanta.

The "artificial rain" of which he speaks is produced on three "fancy" farms within a short distance of Five Points, and according to the unimpaired words of Will Zimmer, C. S. Witham and Loring Brown, who own "overhead irrigation" plants, it means salvation in dry years.

Stories are told of the wonderful crops these farmers grow—two yields of Irish potatoes a year, for instance, from 200 to 300 bushels an acre—of cuttings of alfalfa, corn and beans when the market is bare and beans are worth 12 a bushel.

Yet the system is simple enough. It consists of a pipe supply line.

On posts eight feet high rest pipes about two inches in diameter. These pipes run the whole length of the fields, and the lines of pipe are twenty feet apart. About two feet apart in the pipes are tiny holes. A gasoline engine or pump, which is connected, an abundant supply of water, and the thing is done.

Six hours each evening, when there is no rain and the soil is dry, streams of water spurt from the holes in the pipes. At high pressure the streams are thrown almost on one line of pipe to the next. Handle after handle, coming down like a mist, permeates the whole soil and brings up the labor himself, or it might easily cost more if conditions were entirely favorable.

Increased yield, however, more than overbalance the cost. Loring Brown tells of getting an 1100 crop of Irish potatoes from an acre, under his pipe system. In reality there were two crops, a spring planting and a fall planting, and the potatoes brought a high price because they were so good.

Fail to Realize Work. "I have only one objection to seeing Belmont farm described in the newspapers," said Mr. Brown, as he sat in a swing on his front gallery and surveyed the big acreage. "My objection is that people read of the success of the pipe system and are anxious to try the same method. They don't understand the work involved and fall to take account of the hard work that must go with it."

A farmer, whether he has a fancy farm or one of the old-fashioned kind, must work eighteen hours a day. He must be up the job 24 hours a day. That is what many people forget. They don't know that the pipe system is a labor-saving device, but it is not a magic wand that will do everything for you.

But rain is fresh in the farmer's mind. In Atlanta itself and as far as the Chattahoochee River runs have been sufficient this year. But beyond the river there is serious drought. Crops are drying up. Irrigation works are being operated by the farmers.

And as they sit in front of their homes at night, they can smell the sweet odor of refreshed fields at Belmont—that dry artificial rain.

Zimmer Installs System. Mr. Zimmer, on his Littleville farm, installed an identical system. Though a smaller acreage, he installed it, never has had occasion to regret it. By means of the pipe system, his farm has been blessed with abundant rains.

But rain is fresh in the farmer's mind. In Atlanta itself and as far as the Chattahoochee River runs have been sufficient this year. But beyond the river there is serious drought. Crops are drying up. Irrigation works are being operated by the farmers.

And as they sit in front of their homes at night, they can smell the sweet odor of refreshed fields at Belmont—that dry artificial rain.

WIVES CREDITED WITH KEEPING HUSBANDS ALIVE

Medical Association Finds That Benedict's Regular Exercise Is Better Than Bachelor's.

Supervision by wives as a possible reason for the greater longevity of married men than of bachelors is discussed by "The Journal of the American Medical Association" in its editorial section of the recently published statistics on this point. There is no remark on the statistics of more suicides among married men than bachelors.

The Journal has further information indicating that careful as the married man may be with restraining once removed through the death of the wife, widowers and divorcees are not willing to assume the burden and responsibility of a more regular life as a rule, and consequently avoid many of the dangers of irregular living.

"Regular Living." "This view would seem to be corroborated by the statistics as to the mortality among married men who have lost their wives either by death or divorce. The death rate among these 'unmarried men' is considerably higher than that of husbands of the same age, and even as high as that of the bachelors of the same age.

Widowers Die Fast. "The mortality rate, for instance, of widowers and divorcees men between 20 and 24 is nearly double that of single men. From 20 to 40 it is only 41 to 12, while from 40 to 50 the mortality of divorced and widowers is slightly less than that of single men of the same age. From 50 to 60, however, it is slightly higher once more.

"The rate among widowers and the divorced is at all these ages and somewhat double that of married men of the same age."

Denver Society Woman Provides Bed of Down and Linen for Her Porcine Possession.

Young Robert Newton came home a few evenings ago and brought a baby pig with him. Mrs. Newton took the squirming animal into her arms and tried to make it comfortable, but without success. Finally, in desperation, she went to the linen closet, took out a musty work of hemstitched linen, embroidered with blue, and wrapped it gently about the sleek little pig. Then, laid him cautiously upon the downy pillows beside her.

Piggy gave a satisfied grunt, snuggled up his feet and went off to sleep happily.

This cunning act won Mrs. Newton's approval. She had developed a positive liking for some pet. Her white skin, she combed and perfumed it as she washed, and in a downy bed every night beside his mistress, he also ate from a silver spoon.

Excursion. Atlanta, Carrollton, Forsyth and intermediate points to YBEE and SAVANNAH JULY 25.

DORSEY FIGHTS MOVEMENT TO INDICT CONLEY

Solicitor Is Bombarbed With Letters to Proceed Against Negro as Slayer of Mary Phagan.

THE GRAND JURY IS CALLED Hottest Battle of Famous Case To Be Waged Behind Closed Doors of Inquisitory Body.

Solicitor Dorsey is fighting vigorously the movement in the Grand Jury to indict Jim Conley Monday for the murder of Mary Phagan, despite the bombardment of letters from many citizens and by the sentiment of some of its own members.

It is for the consideration of these letters and petitions, asking the reopening of the Phagan matter, that the meeting has been called. It was in the face of Solicitor Dorsey's bitter opposition that the meeting was called at all. Foreman Beattie issued his deed after a previous Grand Jury had been indicted in its efforts to reopen the case with a view of indicting Jim Conley and after Dorsey explicitly had expressed his strongest disapproval of such a move.

Crucial Battle Coming. With the first skirmish won by those in favor of the indictment of Conley, the hottest battle is yet to be waged behind the closed doors of the jury room. The question that will be proper at this time to reopen the case is whether the grand jury first indicted in the indictment of Leo M. Frank on the charge of slaying Mary Phagan. Solicitor Dorsey will lay before the body for the first time all of his reasons for desiring a postponement of all further investigation until after the trial of Frank.

Should the solicitor be given back again disregarding his wishes and taking up the investigation, he will be forced to take refuge in the indictment of Conley.

With all the weight of evidence which has piled up against the negro, it is regarded as beyond the realm of possibility that he could persuade the jurors to return a "no bill" against Conley on the charge of murder. Dorsey's one remaining hope at this time would be, it is said, to induce the Grand Jury to postpone its action until after the trial of Frank, when it would be in a position to say whether an indictment shall be drawn against Conley on a second charge of murder to which he has confessed, or as the act of murder.

Dorsey Refuse to Comply. The solicitor's attitude in the matter plainly was shown by his statement when Foreman Beattie went to him Friday seeking to have him call the meeting. Dorsey flatly refused and said:

"The meeting's only purpose will be to exploit the evidence and embarrass the State, and I hope the Grand Jury when it meets will decide to leave the matter alone."

"The indictment of Conley at this time will be a useless procedure that will not stop the trial of Frank. It will only have a mild but undesirable effect on the State's case."

"Conley is in jail and is going to stay there for some time. It is where the authorities can put their hands on him, and he can be indicted much more promptly after the Frank case has been disposed of than before, and by the delay there is no danger of a miscarriage of justice."

Atlanta Day To Be Society Event Knoxville Exposition Plans Feature

Mrs. Van Deventer, Daughter of Mr. Justice Lorton, to Visit City for Conservation Fair.

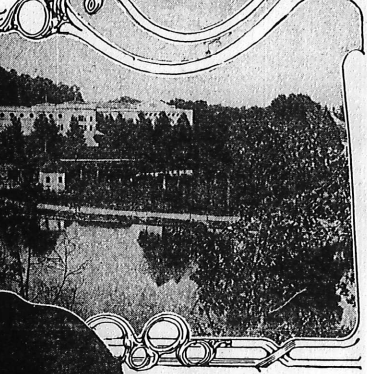

Atlanta Day at the National Conservation Exposition in Knoxville this week will be one of the largest and have many special days arranged for the national fair in the East Tennessee city.

Atlanta Day, according to plans now on foot, will be largely a society function, for the members of the Woman's Department of the exposition headed by Mrs. Horace Van Deventer, a daughter of Justice Lorton of the Supreme Court of the United States, as well as Knoxville's acknowledged society leader, expect to formulate their plans so that many of Atlanta society folk will make the trip to Knoxville for that day.

In addition it is planned to make Atlanta Day at the exposition one of peculiar and intimate interest to all residents of the city. Mrs. Van Deventer to Come Here. The plans for this special day are now in the making. They will be matured probably while the delegation of Knoxville business men is in Atlanta next week, and later when Mrs. Van Deventer and some of her coworkers in the woman's department come to the Georgia metropolis to take up the matter with Atlanta society folk.

In the preparations for what undoubtedly will be the South's greatest exposition, the woman's department is playing a small part. In Knoxville the exposition management considers itself fortunate that Mrs. Van Deventer consented to take the direction of the woman's work. She has a very large circle of friends and acquaintances throughout the country, in cities of the North as well as in cities of the South, and what is more, she has succeeded in interesting large numbers of society women in the work and making his fight against the indictment of Conley.

Miss Mabel Boardman, president of the American Red Cross Society and a woman who finds time in the multi-

Mrs. Van Deventer made a trip to Nashville to interest the women of that city. On very short notice a meeting was called. Two hundred or more Nashville women went to that meeting. A number of men went also. There was much enthusiasm shown. The result was that plans were completed then and there for a Nashville Day.

More than that—the Nashville Park Commissioners, under whose auspices a splendid exhibit of paintings is being shown in the Parthenon of that city, voluntarily and as a compliment to Mrs. Van Deventer decided to continue the exhibition almost to the time set for the opening of the Conservation Exposition. The exhibits will be moved to Knoxville.

One of them will be shown in the Art Building; the other, which is the celebrated collection owned by Charles L. Freer, a millionaire art collector, of Detroit, will be placed in the Woman's Building.

Mrs. Denney also Active. Mrs. Van Deventer and some of her coworkers, among them Mrs. George W. Denney, fourth vice president, who is also the president of the Tennessee State Federation of Women's Clubs and Tennessee, are planning now to come to Atlanta with a most fine lot of millinery over which Atlanta women just when Mrs. Van Deventer and Mrs. Denney will come or when the meeting will be held has been decided to exhibit in the special Ambassador from the United States to England at the time of the coronation of King George, is another society woman who has become interested in the Knoxville show and who will come to that city for one of the special days. Mrs. Hammond is president of the National Civic Federation, which will have an extensive exhibit at the Exposition.

ARTIFICIAL RAIN INSTALLED ON ATLANTA FARM

Will Zimmer, C. S. Witham and Loring Brown Protect Crops With Pipe System.

"These dry nights, when my crops are burning up, I can smell that artificial rain a mile off," said a farmer in the suburbs of Atlanta.

The "artificial rain" of which he speaks is produced on three "fancy" acres within a distance of Five Points, and, according to the unanimous verdict of Will Zimmer, C. S. Witham and Loring Brown, who own "overhead irrigation" plants, it means salvation in dry years.

Stories are told of the wonderful crops these farmers grow—two yields of Irish potatoes a year, for instance, from 200 to 300 bushels an acre—six cuttings of alfalfa, crops of beans when the market is bare and beans are worth \$2 a bushel.

Yet the system is simple enough. On posts eight feet high rest pipes about two inches in diameter. These pipes run the whole length of the field, and the lines of pipe are two or three feet apart.

At high pressure, these streams are thrown almost from one end of the pipe to the other. Handled in convenient intervals make it possible to turn the whole soil over, and streams are deflected in any direction with the spray.

On farms which excel ditch irrigation for Georgia soil for the reason that Georgia clay does not soak up water from a ditch in sufficient quantities. Besides, the soil cakes when water is applied in this way. "Artificial rain," however, coming down like a mist, permeates the whole soil and brings results.

The overhead pipe system is expensive. The cost is estimated at \$20 per acre. This might be reduced somewhat if the farmer formed all the labor himself, or if he hired the best men that money could not entirely favorable. The increased harvest more than overbalances this initial outlay.

Mr. Zimmer, on his Kimballville Farm, installed an identical system, though on a smaller scale, and since he has had sufficient time to experiment to use it. By some stroke of fate, the hard work that must be done by a farmer, whether he has a fancy farm or one of the old-fashioned kind, has been lightened by the year. But beyond the river there is serious drought. Crops are drying up. Irrigation would have been the salvation of the farmer.

And as they sit in front of their homes at night, they can smile the sweet odor of refreshed fields at Belmont—"that darn artificial rain."

WIVES CREDITED WITH KEEPING HUSBANDS ALIVE

Medical Association, Finds That Benedict's Regular Existence Is Better Than Bachelor's.

Supervision by wives as a possible reason for the greater longevity of married men than of bachelors is discussed by The Journal of the American Medical Association in its editorial section of the recently published statistics on this point. There is no remark on the statistics of more multiples among married men than bachelors.

The Journal has further information indicating that careful as the married men may be, with restraint once removed through the death or divorce of the wife, or of husbands and widowers leap into indiscretions and are lapped off more rapidly than either those still in the state or those who escape matrimony.

Live Regularly. Undoubtedly the low death rate among married men is partly due to the fact that, as a rule, those who are in good health are ready to marry, while those with more delicate health, especially if suffering from any delicate ailment, are not willing to assume the responsibility of a family. A factor is that married men live much more regular lives as a rule, and consequently avoid many of the dangers of irregular living.

"This view would seem to be corroborated by the statistics as to the mortality among married men who divorce. These 'unmarried men' is considerably higher than that of bachelors of the same age, and even as a rule it is higher than that of the bachelors of the same age.

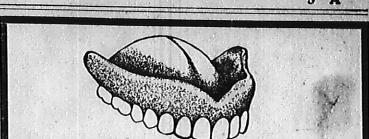

Widowers Die Fast. "The death rate, for instance, of widowers aged 20 and 30 is nearly double that of single men. From 30 to 40 it is only a little higher than that of bachelors of the same age, and from 40 to 50 the mortality of divorced and widowers is slightly higher than that of bachelors of the same age. From 50 to 60, however, it is slightly higher once more.

"At all these ages the mortality rate of course, is not nearly so high as that of married men and sometimes double that of married men of the same age."
